REMARKS

Applicants have amended the Abstract to correct the description of the variables as presented in the structure. Applicants have inserted a statement on page 1 of the application to indicate the priority required by 37 C.F.R. § 1.78. Applicants have corrected a number of typographical and spelling errors on pages 1, 3, 7, 8 and 9, as specifically set forth above.

Applicants have inserted text on page 5 relating to other embodiments of the invention that are fully supported by claims 3-6 as originally filed. The insertion of the text at page 7 of the structure of formula (I') and accompanying description has full literal support in claim 14 in the application as originally filed. The insertion of "obsessive-compulsive disorder" at pages 8 and 9 and claim 10 into the lists of diseases, disorders or conditions for which pharmaceutical compositions comprising the compounds of the invention, and methods employing those compounds/compositions is supported by the description at page 1, line 18.

Applicants have amended claim 1 such that it relates only to compounds where R^2 and R^3 do not join to form a ring and thus deletes the substituent list for R^2 and R^3 where they form a ring. The Examiner will note that subject matter where R^2 and R^3 form a ring is prosecuted in co-pending parent application, Ser. No. 09/402,010. This amendment has support in the specification at page 3, lines 7-19; and from page 4, line 8 to page 5, line 8. Applicants have amended the proviso (b) to clarify the scope of excluded compounds, and have also added a new proviso (c) to exclude species corresponding to intermediates. Consistent with this amendment to claim 1, Applicants have canceled dependent claims 2 which all relates to compounds where the groups R^2 and R^3 do not together form a ring and now fall without the scope of amended claim 1. Applicants have canceled claim 3 as redundant of claim 1. Further, Applicants have canceled claims 11-14. Applicants have made these amendments and cancellations of claims without prejudice to file divisional application(s) drawn to the canceled subject matter.

Applicants have amended claim 9 to recite a pharmaceutical composition comprising a compound of claim 1 and a pharmaceutically acceptable carrier with the deletion of other descriptors in the claim. Applicants have amended claim 10 to correct several typographical, spelling and format errors.

New claims 15 through 23 set forth species corresponding to the invention. New claim 15 is supported by Examples 30 and 34. New claims 16-23 are supported by Examples 2, 3, 4, 5, 6, 7, 8, 9, 31, 32, 33, 35, 38, 39, 40 and 46 and the specification at page 6, lines 14 to 28.

All of the foregoing amendments have support in the application as filed. These amendments add no new matter to the application.

Applicants believe the present preliminary amendment renders the set of pending claims in condition for allowance and request the issuance of a Notice of Allowance. If a telephone interview would assist the furtherance of the prosecution of this application, the Examiner is invited to contact the undersigned.

Respectfully submitted,
